2WP Ratchet Secateurs (PRO8245)

<https://ilcaustralia.org.au/products/8245>

A range of heavy duty ratchet secateurs designed to reduce the force required to cut when pruning. Two models are available, both made of metal.

General Details

Extra product information

These secateurs have a steel blade coated in a non stick material and fibreglass (moderate / heavy duty) or metal (extra heavy duty) handles which are moulded to fit comfortably in the hand.

The tools are able to cut through foliage up to 20mm in thickness using a squeeze and release action.

The ratchet mechanism provides a mechanical advantage in the cutting action - a consistent amount of pressure is required with each squeezing action, rather than the single strong action required on regular pruners.

They all feature a safety clip to keep the blade closed when not in use.

Maintenance

Refer to the supplier and manufacturer manual for maintenance instructions and safety warnings.

Standards

Some assistive technology needs to meet Australian or other standards. Standards may relate to materials, manufacturing, and installation. Products that meet Australian or international standards will have written certification. To find out if a product meets Australian Standards ask the supplier to show you the certificate. For more information about standards see http://www.ilcaustralia.org.au/Using_Assistive_Technology/standards_regulation
